

Are you ready for Online Learning at ELI?

Online learning is different from traditional face-to-face learning in many respects. Some individuals feel more comfortable learning in an online environment than others. Are you a good fit for online learning? Find out by completing the SmarterMeasure assessment. It will take you about 30 minutes from start to finish but you may log out and complete it later if necessary. After you login, you will receive an email from SmarterMeasure with a PIN number that will allow you to log back in later or view your results again.

SmarterMeasure is meant to be an interesting experience by which you may learn more about yourself, online learning, and how to succeed! Your SmarterMeasure score will not prevent you from registering for online classes. Take your time to rate yourself honestly. It is a tool that will help you assess your strengths and opportunities for growth related to online learning in 6 areas.

1. *Life Factors*
2. *Individual Attributes* – procrastination, time management, willingness to ask for help, academic attributes
3. *Learning Styles* – what is your predominant learning style?
4. *Technical Competency, Skills, and Knowledge*
5. *Reading Rate and Recall*
6. *Typing Speed and Accuracy*

You will receive a full color report immediately following the completion of all areas of SmarterMeasure. You may email this report, print it, or download and save for future reference. It also provides some remedial tools related to each area.
