Installing A Microphone

Directions are for PC units using Microsoft Operating System.

Microphones can be purchased through several vendors (online, in store, and over the phone). A good microphone can be purchased for less than $10.00 (in most cases even less than $6.00)

Once you have purchased a microphone you need to plug it into the back of your PC (if you are using a Mac the process may vary)

Locate the appropriate place to plug-in Microphone – most computers have a picture label of a microphone to help you determine the appropriate plug-in.
